Professional Summary

Detail-oriented Junior QA Tester with solid experience in manual and automated testing. Skilled in API testing with Postman, UI testing with Cypress, basic performance testing with k6, and SQL-based validations. I bring strong documentation, analytical, and communication skills to every team. Passionate about continuous learning and delivering high-quality software through organized, efficient testing practices.

Technical Skills

- Testing Tools: Postman, Cypress, Selenium (basic), TestRail, k6
- Programming & Scripting: JavaScript, Java (basic), SQL
- Version Control: Git, GitHub
- CI/CD: GitHub Actions (basic integration)
- Testing Types: Functional, Regression, Smoke, UI/UX Validation, API Testing, Performance (basic)
- Documentation: Bug reports, test cases, test plans
- Databases: SQL Server, MySQL (basic)
- Office Tools: Excel, Word, PowerPoint (intermediate)

Professional Experience

👨‍💻 C&M Development Group S.A.S. – QA Tester (Internship)
Jan 2025 – Jul 2025 | Remote
- Designed and executed functional and regression test cases.
- Used SQL Server for test validations and data checks.
- Automated UI tests with Cypress and API tests with Postman.
- Generated HTML and JSON test reports.
- Participated in agile ceremonies and provided continuous feedback to developers.

Highlighted Projects

- **QA Automation Pipeline**: Integrated API (Postman), UI (Cypress), and Performance (k6) tests with CI/CD (GitHub Actions).
- **Responsive UI Testing**: Tested desktop, tablet, and mobile views for OrangeHRM with Cypress.

- **RPA Simulation**: Automated complete user flows in a demo HRM system using Cypress and Mochawesome for reporting.

Education

🎓 Technical Degree in Software Programming – SENA
Expected Completion: July 2025 (Internship in progress)

Languages

- Spanish: Native
- English: Intermediate (B2+ – confident reading and writing technical documentation)
